Work Experience

Web Designer

June 2021 – Present

Stealth Monitoring
Toronto, ON

Stealth Monitoring is North America's leading provider of live video monitoring solutions, specializing in proactive and intelligent video monitoring technology.

- Created site maps using Adobe Photoshop to produce web optimized JPG files for Detexi VMS Manager, beneficial for the company's monitoring team.
- Configured security systems using Detexi VMS Manager based on IT setup configuration requests.
- Designed and developed websites for Stealth Monitoring clientele using Adobe Dreamweaver.

Innovation Engineer (Co-op)

January – August 2018

Canadian Imperial Bank of Commerce
North York, ON

One of the 'big six' banks of Canada, Canadian Imperial Bank of Commerce mobilizes some 44,000 employees to deliver an enhanced customer-centric banking service.

- Led the development of a data visualization web tool to interpret CIBC's image recognition data more visually.
- Created a software repository system for Frontline lab using Confluence documentation tool. Greatly increasing the team's code management.
- Administered Frontline lab devices inventory with Jira's Quick QR plugin, vastly improving the lab's device tracking.
- Produced and edited video for an internal CIBC townhall event presentation showcasing the company's portfolio of applications serving the bank's customers.
